Sub.: Approval regarding material testing laboratory

Dear Suresh Ji,

TCR Engineering Services Pvt. Ltd. is extending many metallurgical testing services to Tata Steel since many decades and we are highly obliged regarding the services and response of the TCR Engineering Services during urgency period also. TCR is India's most experience and well-equipped metallurgical laboratory. TCR's in-house quality system (accredited to ISO 17025 for Mechanical, PMI, RoHS and Chemical testing) assures that all sample specimens are properly handled, machined, tested, examined and inspected in accordance with test requirements.

We are very much thankful and confident that your team must continue the service that are providing for years and we want to work as a team in near future.

Thanking You

**Chief Scientific Services
