

EXHIBITOR SPOTLIGHT

**A leading engineering
and asset integrity
solutions company.**

BOOTH 1322

What sets us apart is our unique combination of deep metallurgical expertise, advanced inspection technologies, and a proven track record across the Refining, Petrochemical, Power, Fertilizer, and Oil & Gas sectors.

One of the biggest challenges is ensuring the long-term integrity and reliability of materials operating in increasingly demanding environments, including high temperatures, high pressures, hydrogen service, and corrosive conditions.

At the same time, this presents an exciting opportunity to leverage advanced materials characterization, digital asset integrity solutions, and predictive life assessment technologies to enhance safety, sustainability, and asset performance.

WHAT IS BEING SHOWCASED?

- **Asset Integrity Management (AiOM Tool)**
- **Fitness-for-Service (FFS) study**
- **Failure Investigation**
- **ARTiS - Automated Reformer Tube Inspection System**
- **Remaining Life Assessment of Reformer/Heater/Furnace/Boiler tubes based on OMEGA Method (ACRT) and detailed laboratory**

THE
**FERTILIZER
SHOW**

📅 **November 18 - 19, 2026**
📍 Tampa Convention Center,
Tampa, FL, United States
